To: Dr. Karen Shepard
Sequatchie County Coroner / Medical Examiner
170 Cherry Street
Dunlap, TN 37327

AFFIDAVIT OF TRUTH NOTICE OF INFORMATION FILING OF CRIMINAL COMPLAINT

Dear Dr. Shepard,

A criminal complaint was delivered to Sheriff Phillips concerning the safety and welfare of county residents regarding the well established effects of **millimeter wave radio frequency radiation** and the disease in the population that has been rampant since 2020. Specifically we have studied and pulled together the signals of radiation sickness forced on society by private enterprise with regulators not only failing us, but on the contrary supporting endless and unconscionable amounts of radio antenna in our environment which most people are critically uniformed of dangers that stifle scientific debate.

The overexposure, when combined with household use, coupled with the barrage of electrically fields experienced everywhere in public and on the highways. The smart agenda and the push for network nodes have perpetuated this fraud while **silencing science and victims**.

A public awareness campaign to examine the evidence and to protect the residents of the county is underway. The first hurdle was to overcome the failure of Sheriff Phillips in his Constitutional Oath to protect the people by disregarding and **hindering our right to bring evidence before a grand jury**. His oath was unsigned as listed in the following lien document.

We are now underway with this information campaign exercising due diligence by contacting other government agents with oaths to defend the Constitution. This matter is the most serious threat ever faced by America. **The blood clotting, turbo cancers and heart attacks are the expression of oxidative stress mechanisms created violently and undeniably proven with simple testing** which are outlined in scientific papers. Our own blood microscopy, that we have conducted as victims from this poisoning, and other residents, confirm this claim. *We can prove it!*

The signal of mental illness and cognitive impairment are glaring, and the towers at the public school are of extreme concern. We have concluded the Sequatchie County school system is in the worst 3% of schools in relation to proximity of the towers, with the radiation readings correlating to real physical

and mental disabilities that are identical to thousands of scientific papers, even those conducted by the military.

These towers also produce harmonics, this by-product is commonly known as dirty electricity and are on immediate health hazard in the classroom. The documentation points to cancer and death in teachers, medical professionals and even students now. Tennessee recently had four high school, cross country runners die from heart issues! Students now have to take an EKG to participate in scholastic sports. It's not normal and it's not okay to accept it as such. Federal phsycological analysis of local children has been implemented in schools and Department of Homeland Security has a presence in every county due to "childhood behavioral problems." TN Code 68-6-103 is a response acknowledging the increasing of heart related disease in children [reference studies included].

Tennessee code states that your office has authority in action when the sheriff shows malfeasance. TN Code 8-9-106, in any legal proceeding it appears that the sheriff is a party, or, from affidavit filed, that the sheriff is interested, the process maybe directed to the coroner; also, Sheriff's Oath of Office was not signed, as defined in TN Code 8-9-104 Oath of Office [refer to packet on neglect of office, failure to file criminal complaint, see Affidavit in packet]. **TN Code 8- 9-101 in those counties that have a county medical examiner, the county legislative body may vest the duties of the county coroner in the county medical examiner and shall not be required to elect a county coroner.**

The coroner has the authority in delivery presentments to a grand jury which was and is being demanded in our complaint to Sheriff Phillips. These radiological devices fall under Terrorism and Weapons of Mass Destruction as per Tennessee Code: 39-13-802 (a), also 39-13-803 (8) (c)

We have pulled together endless amounts of scientific literature on the subject and have a testimony of harms, facts and solutions which were discovered through our recovery. The technology that almost killed us in Colorado Springs by **unlawful subjection to radiological devices also exist in all places in America currently, and plans are underway to continue this unlawful life ending installation of 5G radio frequency.**

We need you to help us. Our case will not rest or stop until every stone is overturned in this process.

We are requesting that a presentment is made to a criminal grand jury by the coroner, which is authority granted to you, by your office and also an obligation to defend the people of the county as per your oath of office to the Constitution of Tennessee and the u.s. Constitution.

We look forward to hearing from you in a timely manner.

Return service is required and one week is given due to the seriousness and immediacy of this filing.

We, Benjamin Dylan Fowler and Perry Louis Fields, have personal knowledge of the above facts, are competent to testify to the above facts, and declare that the foregoing is true, correct and complete under the penalty of perjury.

WITNESS my hand this _____ day of _____, 2025
